# Benjamin Mehrdad
## (Yamin)

**Full Stack Web Developer**

As an Electrical Engineer with over a decade of experience, after relocating to the UK I made one of my best decisions and followed an old passion for technology. Following the completion of a selective, intense year-long Full Stack Web Development Bootcamp, I am continually improving my skills while looking for my next opportunity. Hardworking, motivated and reliable I have ample experience working individually, as part of a team and leading others.

NW1, London
